The Standard Lighting Co.

Cleveland, Ohio.

MAIN OFFICE,
122 WATER STREET.

U. S. A.

Our improved Vapor Burners furnish a light equal to the best Coal Gas, and therefore for lighting Stores, Dwellings, Halls, etc., are greatly superior to Oil Lamps in every respect, costing less for a larger amount of light, and as they burn without wick or chimney, are much less trouble to take care of.

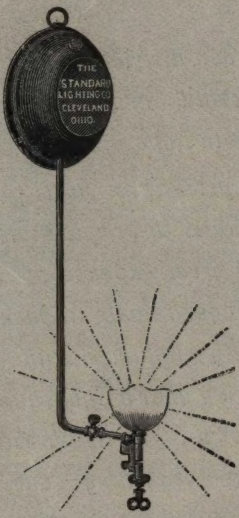
The Plate Burner (Cut No. 2) being exceedingly simple in construction, having no auxiliary generating flame, and burning without odor, we recommend as especially adapted for inside lighting. We fit either the Tip or Plate Burner to any form of chandelier, bracket, or stand lamp desired.

This Company pays special attention to lighting the streets of Cities and Towns,

#6849 3238 Td Cat
10-22-80 1880
9-29-2004 Standard

and suburban districts where Gas Mains do not extend, furnishing fixtures with attendance to light and care for same, at a stated price per post per annum. Towns where the population does not justify the great expense of Gas Works need no longer remain in darkness or be insufficiently lighted with Coal Oil Lamps, as we offer a light equal to gas, at a much less cost. Write for estimates and information regarding our duplicate system of lighting, the **ONLY ONE** *by which a vapor burner, like Coal Gas, is ignited in the lantern spontaneously, and without delay or smoke.*

We deal in a full line of Street, Mill, and Lawn Lanterns, suitable for Gas, Gasoline or Oil lights.



No. 1.

Above cut shows our Tip Burner giving a flame similar to gas and will furnish an equal amount of light at a much less cost.

Retail Price for Burner, Atomizer Tube and Cock, per doz. - $15.00.

Retail Price for Burner, Atomizer Tube, Cock, and Reservoir, per doz., $24.00.

No. 2.

This Plate Burner is simple, very efficient, and for inside use, is always satisfactory.

Both of these burners (Nos. 1 & 2) are intended to burn 74° redistilled gasoline with which they will never gum or clog, and, unlike Oil Lamps, always be in order for constant use.

Prices same as No. 1.

The wide spread introduction and general use of the **OIL VAPOR TORCH** *for lighting large areas, both in and out of buildings, such as Car, Rail Road, and Machine Shops, Rolling Mills, Foundries, Coal Mine Entries, Wharfs, etc., etc., is the best and most conclusive evidence of its merit and great utility as an illuminating device, wherever a safe, brilliant, powerful and economical light is wanted.*

The **STANDARD OIL TORCH** *is the best of its class, produces a strong, steady, white, smokeless flame, giving a light equal to a half dozen gas burners, and at a much less cost. Our torch burns any common kerosene or Coal Oil* **WITHOUT A WICK,** *is simple in construction, of few parts, easily cleaned, will not smoke when kept free of deposit, and is* **GUARANTEED** *to vaporize the oil during the coldest weather.*

We make the **STANDARD** *as a* **WALL** *light and also in different sizes as* **HAND** *or* **PORTABLE** *torches that can be*

EASILY CARRIED ABOUT *and which are especially adapted for use in the innumerable instances where in Machine Shops, Locomotive Round Houses, Saw Mills, etc., it is desirable to have a light close to the work.*

These Safety Portable Torches are the **ONLY ONES** *in the market, and, as because of a more forcible vapor jet their flame is firmer and better oxygenated the degree of either depending on the pressure,—controlled at will,—and all tendency to smoke removed, they burn clear and without odor under conditions where a wall torch will not. Their convenience and powerful light make these Torches a desirable substitute in all manufactories where Oil Lamps are used, a merit recognized in an extended and rapidly increasing sale.*

The **STANDARD GASOLINE** *Torch is unsurpassed, and adapted equally well for inside and outside use. For Street Venders, Market and Fruit Stands, Camping and Fishing Parties, it will be found exactly what is needed,—a cheap, powerful, and reliable light.*

No. 1.

This cut represents our Safety Oil **BENCH** *Torch with No. 1 burner, which produces a light equal to about four Oil Lamps, the reservoir holds a half gallon of oil and is made of both Galvanized Iron and Tin and is intended for lathe and bench work in machine, tin, and similar shops.*

We also fit our No. 2 burner on this size reservoir where a larger light is wanted with same amount of fluid.

Retail Prices.

Tin Reservoir, No. 1 Burner	*$3.50.*
" " No. 2 "	*3.75.*
Galvanized Iron Reservoir, No. 1	*3.75.*
" " " No. 2	*4.00.*

No. 2.

This cut represents our Foundry, Mill, and **RAIL ROAD** *Torch. The reservoir holds one gallon of oil. The burner produces a light equal to about six Gas Jets and is intended for use in Locomotive Round Houses, Mills, Blast Furnaces, Warehouses, Saw Mills, Car Shops, Vessels, Coal Mines, etc., etc.*

Retail Prices.

Tin Reservoir, No. 2 Burner, $4.00.

Galvanized Iron Reservoir, No. 2 burner, - - - - - 4.25.

No. 3.

Above cut shows our Double Foundry and Mill torch, designed for special use where a large light is wanted, gives twice the light of our No. 2 torch, holds six quarts of Oil, and is made only of Galvanized Iron.

Retail price, - - $6.00.

RETAIL PRICE:

Gasoline Torch,	$3.50.
Oil Torch,	$3.50

No. 4.

This cut shows our **WALL** *Torch intended to be hung up—for use in all manufactories as a side light. All reservoirs are made of* **EXTRA HEAVY** *Cross Tin, and holding one gallon of oil. On this we use our No. 2 Burner. Our* **PORTABLE** *Torches are* **ABSOLUTELY** *non-explosive, can not be filled while burning, and give out no odor of oil.*

Gasoline Torch similar to No. 4.
